PROFESSIONAL SUMMARY

Data analyst and product analyst with 1+ years of experience turning operational, finance, healthcare, and user engagement data into business insights. UC Berkeley MS Analytics candidate (GPA 4.0) skilled in SQL, Python, Tableau, Power BI, and A/B testing; builds KPI dashboards, analysis-ready datasets, and stakeholder-ready recommendations.

EDUCATION

University of California-Berkeley, USA Aug 2025 - Aug 2026

Master of Science in Analytics (All course work completed by May 2026), GPA 4.00/4.00

Kean University, USA Aug 2021 - May 2025

Bachelor of Science in Finance (Minoring Economics & Math), GPA 3.90/4.00

SKILLS

- **Programming & Analytics:** SQL, Python (Pandas, NumPy), R, Excel, Git
- **BI & Platforms:** Tableau, Power BI, Databricks, AWS, Snowflake
- **Analysis:** KPI Reporting, Dashboard Development, A/B Testing, Statistical Analysis, Customer Segmentation, Predictive Modeling

PROFESSIONAL EXPERIENCE

Gala Circle Inc. San Jose, CA May 2026 - Present

Data Analyst Intern

- Validated operational and financial metrics across 30+ restaurant merchants, creating analysis-ready performance datasets.
- Standardized merchant KPI logic and QA checks for revenue, order volume, and conversion metrics.
- Prioritized merchants into 3-5 tiers by scale, operations, and service needs to guide partner strategy and expansion.
- Triangulated structured data with 10+ merchant interviews to identify demand drivers, bottlenecks, and growth opportunities.
- Analyzed outreach and conversion data across 50+ partner and merchant records, surfacing trends for expansion planning.

University of California-Berkeley Jan 2026 - Present

Data Analyst

- Automated cleaning and integration of circulation, digital access, and space utilization data using Python and SQL CTEs.
- Delivered Tableau dashboard tracking 10+ KPIs across 12 library branches, reducing stakeholder reporting time by 30%.
- Diagnosed usage patterns, demand trends, and peak periods across departments to support evidence-based resource allocation.
- Translated findings into service optimization recommendations for librarians, IT staff, and administrative stakeholders.

Xiaochuan Technology June 2025 - Aug 2025

Operation Analyst Intern

- Segmented 10,000+ U.S. social posts with MySQL/clustering across tags, comment types, and engagement metrics.
- Ran A/B tests for recommendation changes, lifting top comments 22%, daily UGC comments 2,000+, and comment rate 7.3%.
- Developed Tableau dashboards from MySQL outputs to monitor UGC engagement trends for product and operations stakeholders.
- Partnered with product and engineering teams to deploy scalable recommendation optimizations in production.

Dongxing Securities May 2024 - Aug 2024

Data Analyst Intern

- Analyzed financial data in Python and built 6+ composite factors to evaluate CSI 500 strategy performance.
- Improved multi-factor model performance by +1.52% annualized alpha, +0.09 IR, and -1.05% relative drawdown through statistical analysis.
- Collaborated with traders and strategists to gather requirements, explore feasible factors, and refine data-driven investment strategy.

Industrial and Commercial Bank of China Nov 2023 - Jan 2024

Data Analyst Intern

- Used SQL to extract, clean, and transform transaction and market data for portfolio analysis across 15+ client accounts.
- Performed return attribution and volatility analysis to uncover allocation inefficiencies, improving portfolio risk-adjusted return by 2.3%.
- Standardized validation and reporting templates, reducing reporting discrepancies by 20% and improving portfolio analysis accuracy.
- Built Excel-based tracking worksheets and portfolio reports with visualization components for client monitoring.

IQVIA Solutions Enterprise Jun 2023 - Aug 2023

Management Consultant Intern

- Analyzed 12-city healthcare data on providers, demographics, and pricing to size China's HPV vaccine market.
- Built SQL-based analysis and ETL pipelines, combining quantitative market modeling with insights from 20+ physicians and 10+ pharma leaders.
- Designed 5+ interview guides, capturing physician and pharma-leader insights for market-sizing assumptions.
- Created deliverables supporting a pharma IPO strategy through statistical analysis and visual storytelling in Tableau.

PROJECTS

Product Experimentation & Causal Impact Platform ([GitHub](#) | [Demo](#)) Sep 2025 – Mar 2026

- Built an experimentation analytics workspace to evaluate product changes across 8K users, 784K activity events, and 16.8K marketplace orders.
- Modeled user journeys from exposure to conversion, separating funnel drop-offs, marketplace behavior, and post-launch performance signals.
- Developed A/B test validation checks for sample ratio mismatch, pre-period balance, guardrail metrics, and statistical lift interpretation.
- Quantified an 11.8pp conversion lift and translated test results into launch recommendations, risk flags, and follow-up analysis priorities.
- Created monitoring views for review quality, delivery risk, and marketplace friction to help product teams identify root-cause drivers after release.

AI Customer Intelligence & Campaign ROI Platform ([GitHub](#) | [Demo](#)) Jan 2025 – Aug 2025

- Built customer intelligence dashboard to evaluate customer segments, repeat purchase behavior, campaign lift, and revenue impact.
- Created RFM, lifecycle, channel cohort, and campaign tables for targeted-offer recommendations.
- Implemented DuckDB SQL reporting layer for cohort summaries, holdout analysis, and reusable campaign KPI views.
- Benchmarked repeat-purchase models and surfaced feature importance; selected Random Forest with 0.709 ROC-AUC.
- Measured 7.2pp lift vs. holdout, projecting \$2.0K net profit and 115.7% campaign ROI.
